White Paper

Hiring Research: EHS Generalist Graduates: Expectations from Hiring Managers, Recent Graduates and Students

A summary of research conducted by the following professional societies and trade/industry organizations: AIHA, ARIN, AIPEP, and OSHA.

Introduction
EHS Generalists are multi-disciplinary professionals who work within the broader environmental, health, and safety (EHS) field. These are professional membership associations and credentialing organizations which serve the needs of professionals who are more focused on a single discipline within the EHS and occupational hygiene (OH) professions. Unlike other professional organizations and credentialing organizations, AIHA, ARIN, AIPEP, and OSHA - collaborated to conduct qualitative research regarding the hiring requirements and expectations of organizations for recent EHS Generalist graduates, with a focus on the unique aspects of these professionals and the entry-level opportunities available to them.

In 2017, AIHA conducted an exploratory research project to better understand the preparation of recent EHS graduates and early career EHS Generalists as they enter the workforce. As a leading provider of industrial hygiene (IH) and related health and safety education, AIHA was interested to know whether the EHS Generalist might benefit from education and training about specific EHS topics. As a professional community for corporate EHS decision-makers, AIHA collaborated with AIPEP on the research to aid environmental managers in hiring and developing EHS Generalists.

The participant categories in this research were:

- Hiring managers/users of EHS Generalists, both environmental and IH managers
- Professors of environmental and related science programs
- EHS graduates with less than 4 years' experience
- EHS students (not EHS undergraduates) with AIHA on the research to aid environmental managers in hiring and developing EHS Generalists.

EHS Generalist

Do you have the right skills and credentials to land your first or next job? See what hiring managers are looking for in an EHS Generalist.
