

Volunteer Group Mission Statement

The committee supports and promotes the application of human health risk assessment to better understand and control the hazards found within workplace and environmental settings.

Goals and Objectives

- Promote the advancement of risk assessment within the field of industrial hygiene to better understand and control the hazards found within the workplace and environmental settings.
- Organize and develop state-of-the-art presentations, symposiums, and continuing education courses on the application of risk assessment within the workplace.
- Develop collaborations with other AIHA committees and external organizations to promote the use of the principles of risk assessment to evaluate the risks of exposures to chemical, biological and physical agents.
