For resources to protect workers' health in chemical manufacturing facilities, visit [workerhealthandsafety.org/chemical-manufacturing](https://workerhealthandsafety.org/chemical-manufacturing). The site includes information about identifying and reducing risks, and connecting with an OHS professional.

## An OHS expert will ...

Assess training programs and procedures to identify gaps

May recommend eco industrial cleaning chemicals to mitigate risks

Train your employees to address health and safety risks

An estimated 32 million employees in chemical manufacturing facilities are potentially exposed to one or more of the 650,000 chemical hazards<sup>1</sup>
