

Construction contractors interested in improving the health climate at their site, accessing resources and hiring an occupational health professional can visit:  
[www.workerhealthsafety.org/construction](http://www.workerhealthsafety.org/construction).

## Benefits to Staying Healthy in Construction

In a national survey<sup>1</sup>, more than 50 percent of construction workers report exposure to vapors, gas, dust or fumes at work twice a week or more – **twice the average of all US workers**.

Your employees deserve a safer, healthier workplace. Together, we can reduce those risks.
