For resources to help first responders stay healthy, visit workerhealthsafety.org/first-responders. The site includes information about identifying and reducing risks, and connecting with an OHS professional.

Benefits to First Responders Staying Healthy

More than 88,000 firefighters are injured each year¹ and police officers are three times more likely to sustain a nonfatal injury than all other U.S. workers.²

First responders deserve a safe, healthy workplace, as they serve our communities across the country.
