

Virtual PDC

COVID-19 Viability & Transmissibility in Air and on Surfaces

Control Banding: From Exposure to Process

Wednesday, December 9, 2020

Learning objectives include but will not be limited to:

- Improving employee health outcomes to exposures to biological aerosols
- Define transmission modes - focus on droplet, airborne, aerosol
- Size of COVID-19 virus, transmissibility (hang time) in different settings for similar coronaviruses (aerosol generation, viability in the environment, access to target tissues)

- Risk group of COVID-19 relative to other pathogens (influenza, TB, SARS, etc.)
- Different types of masks / levels of respiratory protection / when each type is appropriate

Speaker:

Dr. Lisa Brosseau, ScD, CIH

Date:

Wednesday, December 9, 2020

Time:

Noon - 2:30PM

Cost:

Full member: \$20

Affiliate Members and Guests: \$30
