PAY GRADE:	327A
JOB TYPE:	PSA NEARI (DOH) (92)
NAME OF BARGAINING UNIT UNION:	PSA NEARI (DOH) (92)
LOCATION:	Three Capitol Hill, Providence
SCHEDULED WORK DAYS: HOURS OF WORK	Monday-Friday 8:30AM-4:30PM
WORK WEEK:	Non-Standard
RESTRICTIONS/LIMITATIONS:	Restricted\Limited to Federal Funding; Restricted\Limited to the leave to protect of the prior incumbent
JOB NUMBER:	1179-50915-4
CLASS DEFINITION:	

GENERAL STATEMENT OF DUTIES: To perform technical industrial hygiene activities relating to the identification and evaluation of hazardous exposures to chemical and physical agents, recommendations for and review of hazard control programs and systems, and review of and participation in related training activities; and to do related work as required.

SUPERVISION RECEIVED: Receives general instructions from a superior as to policies and objectives, with some latitude for the exercise of independent judgement; work is subject to review for conformance with departmental rules and regulations.

SUPERVISION EXERCISED: Assists in the supervision of the work of a subordinate staff assigned to assist.

ILLUSTRATIVE EXAMPLES OF WORK PERFORMED:

To perform technical industrial hygiene activities relating to the identification and evaluation of

hazardous exposures to chemical and physical agents, recommendations for and review of hazard control programs and systems and review of and participation in related training activities.

To collect air samples and other appropriate samples, and to utilize direct reading chemical monitors, noise dosimeters, radiation detectors and other types of technical equipment to effectively characterize the exposures of individuals to potential health hazards.

To exercise professional judgement in directing the handling of samples and the types of analyses to be performed on samples collected during surveys and inspections; and, to perform the necessary calculations to properly convert analytical results to meaningful exposure measures.

To perform evaluations utilizing complex technical instruments for the testing of ventilation systems, noise abatement systems, radiation shielding and other measures designed to abate hazards; and, to exercise professional judgement in evaluating the results of this testing for deciding upon the adequacy of control measures.

To exercise professional judgement in deciding whether information collected during inspections and surveys constitute violations of industrial hygiene regulations and standards.

To recommend specific control measures such as training programs, personal protective equipment, work practice modifications, control ventilation, product substitution and other measures to bring hazardous exposures and conditions within regulatory limits.

To prepare appropriate regulatory correspondence and technical reports based on inspection and survey activities, describing the activities involved, outlining the results of any testing performed, suggesting appropriate abatement measures and requiring a reasonable abatement schedule.

To maintain appropriate records of activities and follow up on violations to insure corrective actions have been taken.

To review for conformance with regulatory requirements technical plans and materials submitted by applicants for various licenses to perform hazardous operations; and, to review for adequacy the qualifications of individuals applying for certifications as competent to provide certain industrial hygiene services under state statutes.

To assist in the planning and presentation of training programs related to hazardous materials and operations for the public and for individuals seeking specific certifications to perform industrial hygiene functions under state statutes.

To provide consultation to the public, employers, employees and others on the specific hazards related to various exposures to chemical and physical agents and the methods for controlling such exposures.

To participate in the formulation of regulations addressing industrial hygiene concerns.

As directed, to testify before duly constituted bodies regarding the activities which have been supervised or conducted and the professional judgements exercised.

To do related work as required.

REQUIRED QUALIFICATIONS FOR APPOINTMENT:

KNOWLEDGES, SKILLS AND CAPACITIES: A working knowledge of industrial hygiene procedures, regulations and standards and the ability to apply such procedures for the evaluation and control of chemical and physical agent exposure hazards; a familiarity with materials and processes used in industry; the ability to analyze and interpret the results of field and laboratory work; the ability to effectively communicate technically oriented information, both verbally and in writing; the ability to establish and maintain working relationships with representatives of industry, various agencies and members of the public; the ability to prepare and present instructional materials related to industrial hygiene topics; and related capacities and abilities.

EDUCATION AND EXPERIENCE:

Education: Such as may have been gained through: graduation from a college of recognized standing supplemented by completion of college courses in chemistry, physics and mathematics and successful completion of training courses in industrial hygiene related topics offered by recognized colleges or nationally recognized training centers for industrial hygiene;

and

Experience: Such as may have been gained through: employment in a technical position conducting inspections and surveys for the determination of industrial health hazards.

Or, any combination of education and experience that shall be substantially equivalent to the above education and experience.

SUPPLEMENTAL INFORMATION:

This industrial hygienist position will be responsible for conducting and recording OSHA On-site Consultations in small businesses within the state of Rhode Island. Duties include on-site consultations; hazard reports; mitigation reports, and recording of all data received about the businesses consulted with. All OSHA activities will be conducted in compliance with the OSHA On-Site Cooperative Agreement.

- This Industrial Hygienist will ensure compliance with RIDOH Regulation 216-RICR-50-15-1 – Asbestos Control and EPA requirements and provide technical assistance to the regulated community.
- Assist with school inspections located in Environmental Justice Areas defined by EPA, generates appropriate correspondence to the superintendent and facilities director.
- Perform technical reviews of asbestos/management plans, generates appropriate correspondence to the facility owners, licensed asbestos consultants and abatement contractors.
