Employment Opportunities

Cal/OSHA Field Inspectors - Industrial Hygienists and Safety Engineers

On September 29, Cal/OSHA posted 18 new Industrial Hygienist positions for work across the state. These are field positions that conduct compliance inspections in many different settings and consult with employers on a wide range of health and safety issues. Cal/OSHA also posted 10 new Safety Engineer positions.

Want to know more? Cal/OSHA is hosting a Virtual Career Fair on October 13 at 10 a.m. PST.

In 2020, California had five of the largest wildfires in state history during that one year alone. This year, the Dixie fire continues to burn and is now the largest single wildfire in state history. Poor air quality due to wildfire smoke may persist for months and spread to neighboring counties and states. Smoke is made up of a mixture of gases and fine particles that can cause a range of health problems. These respiratory irritants can cause coughing, wheezing, and difficulty breathing; they can also cause aggravation of pre-existing medical conditions and increased risk of premature death.

Learn more about the Cal/OSHA's protection from wildfire smoke regulation and what it requires employers to do at <https://bit.ly/ohwWildfireSmoke>
